

1. Menzel, Donald H. **Flying Saucers**. Cambridge: Harvard University Press, 1953. First edition. 319pp. Octavo [21 cm] Bright red cloth over boards. The inside margins of the front flyleaf and half title page have been taped. In a dust jacket, with age-toning, and moderate rubbing, creasing, and chipping to the edges. The reverse of the jacket is lightly foxed. Good + in a very good dust jacket. \$85

*At the time of his death, in 1976, Menzel was one of the leading authorities on the sun. In 1938, he developed the U.S.'s first coronagraph, a telescopic device that enables scientists to study the sun's glowing halo without the help of an eclipse.*

*Inscribed by Menzel to fellow UFO enthusiast George W. Earley on the front free endpaper. Earley's bookplate is on the front pastedown. Earley was a U.S. engineer and editor. He was involved in science fiction fandom during the 1940s. He is the author of "Encounters with Aliens: UFOs and Alien Beings in Science Fiction."*

2. Lethbridge, T. C. **The Legend of the Sons of God: A Fantasy?** London: Routledge & Kegan Paul, 1972. First edition. ISBN: 0710071590. 118pp. Octavo [22.5 cm] Brown paper over boards. There is a small numerical ink stamp on the front free endpaper. In the dust jacket with light surface and edge wear. Very good + in a very good dust jacket. \$50

*Lethbridge, a prominent naturalist and archaeologist, is best known for his books about E.S.P. and related phenomena. In this book he urges the reader to think in a new way about the origins of Man.*

*From the dust jacket- "... who were the sons of God mentioned in Genesis? what was the war in Heaven? for what purpose were the great stone rows and circles of the Megalithic period constructed? Mr. Lethbridge's investigations into these puzzles led him to consider other problems: are there such things as flying saucers? is there more than one species of Man, and is he to be found on many different planets?"*

3. Keyhoe, Major Donald E. **Flying Saucers from Outer Space**. New York: Henry Holt and Company, 1953. First edition. 276pp. Octavo [21 cm] Black cloth over boards. The backstrip and boards have areas of light abrasion. There are thin tape stains to the edges of the front pastedown. There is a former owner's name on the front free endpaper. In a dust jacket with periodic small closed tears and chips in the edges. The deepest tear is closed, and measures 1" deep. Ex-libris UFO enthusiast George W. Earley, with his bookplate on the front pastedown. Earley was a U.S. engineer and editor. He was involved in science fiction fandom during the 1940s. He is the author of "Encounters with Aliens: UFOs and Alien Beings in Science Fiction." Good + in a very good dust jacket. \$50

*From the dust jacket- "Major Donald E. Keyhoe, U.S.M.C., Ret., is a responsible, accurate reporter who has made an intensive study of flying saucers. He has worked closely with the U.S. Air Force agency investigating the saucers, Project Bluebook, and has secured scores of Air Force sighting and intelligence reports, here made public for the first time."*

"I knew it was getting hot. What have they decided to do about the Tremonton pictures?"

"Tremonton? I never heard of them."

"Oh-oh, I guess I talked out of turn. They must have a tighter lid on them than I thought." Brennard hesitated. "Well, since I've spilled it, if you promise not to use it without Air Force permission—"

"Don't worry, I wouldn't use any Air Force case unless it was cleared."

"OK. Well, these pictures were taken by a Navy warrant officer back in July. They're movies, and they show several saucers maneuvering near Tremonton, Utah—the Air Force calls them the Utah or 'U' pictures. The ATIC lab in Dayton and Navy Photo-Intelligence have been secretly analyzing them for months."

"How much do they show?" I asked quickly. This could be the break I'd been looking for.

"The discs weren't close enough for much detail," he answered. "The film shows a formation of round, bright objects going like a bat out of hell. They're also maneuvering in the formation, and at the end one of the saucers reverses its course and leaves the rest. But it's what the analysis shows that counts. It proves the things were round machines of some kind, making speeds and turns no plane on earth could duplicate."

"At first some of the Air Force skeptics wouldn't believe it. Even though they checked on this warrant officer and found he was OK, they still said it must be a fake. So the lab men tried to duplicate the pictures. They didn't have any luck, and the experts all agree—Navy and Air Force both—that the film's genuine."

*From the dust jacket-*

*"Are extraterrestrials abducting human beings and subjecting them to terrifying physical examinations? Have UFO-nauts conducted bizarre genetic experiments by invading the bedrooms of teenage girls to impregnate them and later returning to remove their unborn babies? Have alien beings kidnapped young children and removed flesh samples as part of an effort to cross-breed with the human race?*

*"A definitive answer to these questions, based on hard facts, is provided in UFO-Abductions: A Dangerous Game, by Philip J. Klass."*

*Walter N. Webb experienced his own personal sighting in 1951. He is best known as the initial investigator of the first widely publicized UFO abduction case, that of Barney and Betty Hill of New Hampshire.*

*In the preface to this book the author states, "The account that follows is a detailed case history of an investigation into a UFO double-witness abduction experience. Taking the UFO sighting as a whole, it involves almost every aspect of the UFO phenomenon ever reported. As an abduction report, the Buff Ledge event is typical of the scenarios often described; that is, while it is composed of certain basic features common to all such cases, it also contains variations quite different from most examples. The incident may very well be unprecedented for a dual-witness abduction episode in that neither person communicated with the other for eleven years after the experience (including the days immediately following the encounter), virtually eliminating any chance of contamination of their respective accounts. This salient fact alone made the decade-old sighting worth pursuing."*

# ENCOUNTER AT BUFF LEDGE

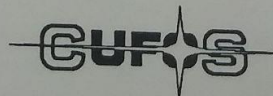

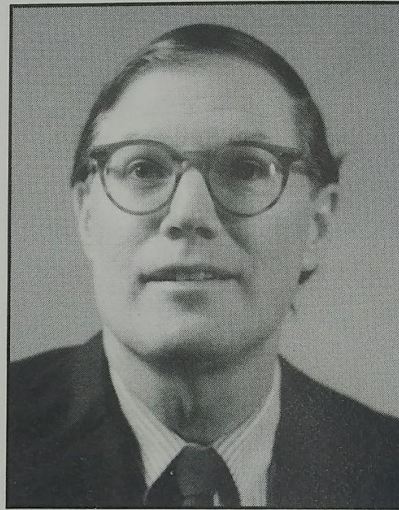

My interest having been sparked by a personal sighting in 1951, I have researched and investigated UFO sighting reports for 42 years (since 1952). I am perhaps best known as the initial investigator of the first widely publicized UFO abduction case, that of Barney and Betty Hill of New Hampshire. (See John G. Fuller's *The Interrupted Journey*, Dial Press, 1966.)

Professionally I served under the late J. Allen Hynek (founder of the Center for UFO Studies) at the Smithsonian Astrophysical Observatory's Optical Satellite Tracking Program in 1957-58. After my duties there, I spent 32 years at Boston's Charles Hayden Planetarium at the Museum of Science as senior lecturer, assistant director, and operations manager. I wrote more than 100 show scripts and also articles for the *Museum of Science Magazine/Newsletter*.

Over the years I have served four national UFO organizations, three of them as an astronomy consultant. Currently I am Astronomy Consultant for the Mutual UFO Network and a Columnist ("The Night Sky") for the *MUFON UFO Journal*, as well as a Senior Research Associate and Field Investigator for the J. Allen Hynek Center for UFO Studies. I have contributed many articles and case reports to UFO periodicals and other publications, including a chapter in Coral and Jim Lorenzen's *Encounters with UFO Occupants* (Berkley, 1976), six articles for Ron Story's *The Encyclopedia of UFOs* (Doubleday, 1980), and a paper in the *MUFON 1988 UFO Symposium Proceedings*.

Among my most recent activities, I appeared in MPI Home Video's *Contact UFO: Alien Abductions* (released in 1991) and was a member of the Conference Committee for the Abduction Study Conference held at MIT in June 1992. An article by me on the role of sleep paralysis in bedroom encounters appears in an early 1993 issue of *UFO* magazine.

*From the dust jacket-*

*"On June 24, 1947, a private pilot, Kenneth Arnold, reported that he had encountered nine flat shiny objects above the Cascade Mountains. 'They flew like a saucer does when you skim it across water,' he said; thus the term 'flying saucer' was born. Contrary to popular belief, however, similar sightings have been recorded in histories and scientific journals for over two centuries. Here is the first fully documented account of UFOs, tracing their long and fascinating history from the earliest sightings in 1745 to the present day."*
